

SCOPE OF PROJECT

BARKER LEMAR was retained by the Metro Waste Authority (MWA) to renew the landfill operating permit for the Phase I area of the Metro Park East (MPE) Landfill.

IMPLEMENTATION

BARKER LEMAR prepared and submitted an Iowa Department of Natural Resources (IDNR) Landfill Permit Application Form 50 and the supporting documentation for the permit renewal for Phase I area of the MPE Landfill. Due to the evolution of the Phase I area, a review of historical documents and preparation of a reference system was required for the permit renewal. With prior agreement from IDNR, the submittal did not follow the 18 appendix format. However, the IDNR guidelines for the development and operation of a sanitary disposal project were used to form a reference system.

The reference system correlated all existing documents to the IDNR's 18 appendix format. If previous documents did not adequately address the guidelines' item or if further clarification or explanation of the referenced section was required, then additional information was added to the reference system's report and included with the submittal.

The final draft of the permit renewal was submitted in July 2006 and approved in September 2006 by the IDNR.

SERVICES

Gathering and reviewing of existing documents; creating the review outline of the IDNR Guideline and referencing to documents; providing additional information if not addressed previously or adequately.

TIMELINE

Project Start Date: June 2006

Project Completed: July 2006
